NOMAD

Due to its slightly larger footprint, the Nomad offers a significantly more comfortable living experience. In contrast to the Vagabond, it provides an additional 9m³ of living space, making it more spacious and welcoming. The sophisticated staircase features smart storage solutions and has the capacity to accommodate a larger refrigerator. All models in our fleet include a height-adjustable mezzanine, designed to support a 1.60m mattress that retracts into the ceiling during the day, thereby creating a spacious living room.

The cleverly integrated windows ensure the living room is bright and airy. Living in the Nomad comfortably accommodates two residents. Thanks to the second fixed mezzanine above the bathroom, the Nomad can also provide a pleasant overnight stay for up to four people.
