interior according to your ideas.**

PIONEER

The star of our fleet is the Pioneer. With its length of 8.40m, it offers many layout options. In our standard model, the bedroom on the second floor (which has headroom) provides more privacy by creating a visually separate room. Moreover, the additional 18m³ of space compared to the Vagabond allows for a larger living area, ample storage, and a more spacious kitchen.

The extra height-adjustable mezzanine, designed to accommodate a 1.60m mattress, retracts into the ceiling during the day to create a spacious living room and offers sleeping space for 2 additional people. The generously integrated sliding windows ensure the living room is bright and airy.
