Can't find the right one?
We also can custom design your dream interior according to your ideas.

VAGABOND

The smallest of our Tiny House fleet is a true miracle in terms of space. Thanks to the innovative layout and clever storage ideas, it is highly functional with everything needed for living. The height-adjustable mezzanine, designed to accommodate a 1.60m mattress, retracts below the ceiling during the day, creating a spacious living room.

The cleverly integrated windows ensure the living room is bright and airy. While permanent occupancy by two people is possible, we would rather recommend this size as a holiday home or for single residents. Advantage: Due to its low weight, the Vagabond can be moved with your own vehicle.
